ROJAS TRAILER REPAIR LLC

Trailer & Box Truck Repair — Elizabeth, New Jersey

Real work, real photos. Every picture in this catalog is an actual job done by our crew — no stock photos.

Emergency Road Service — Call 929-282-5666

15 Kerlyn Ct, Elizabeth, NJ 07202 · info@rojastrailerrepair.com · RojasTrailerRepair.com

What We Do

Everything on trailers and box trucks — including reefers (body and structure; we don't service reefer engines/cooling units). One shop, one call, in the yard or on the road.

Photo evidence on every job. We document your repair with before, during and after photos and send them to you — so you see exactly what was done, every time.

- **Body & collision repair** — panels, roofs, noses, doors, floors
- **Welding & fabrication** — frame, crossmembers, custom work
- **Brakes & suspension** — chambers, drums, airbags, hangers
- **Electrical & lights** — wiring, sockets, LED upgrades
- **Tires & wheels** — blowouts, changes, hub service
- **Landing gear & liftgates** — repair and replacement
- **Undercarriage & frame** — structural repair
- **Maintenance & PM service** — inspections, greasing
- **Road service** — on-site and roadside repairs
- **Trailer rentals** — call for availability

Welding & fabrication and brake work, photographed on the job. Fleet accounts welcome — we keep your trailers rolling.

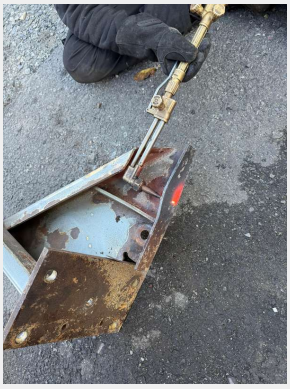

Services in Action

Our crew, our work — the main services, photographed on real jobs.

Welding & fabrication

Frame, crossmember and custom fabrication — welded right, the first time.

Structural welding and custom fabrication — frames, doors, crossmembers and more.

Brakes

Chambers, drums, shoes and complete hub service.

Complete brake service — shoes, drums, chambers and hardware, fitted and tested.

Tires & wheels

Blowouts and tire changes — in the yard or on the road.

Tire changes and blowout repairs — in the yard or on the road.

Suspension

Airbags, bushings, hangers and shocks.

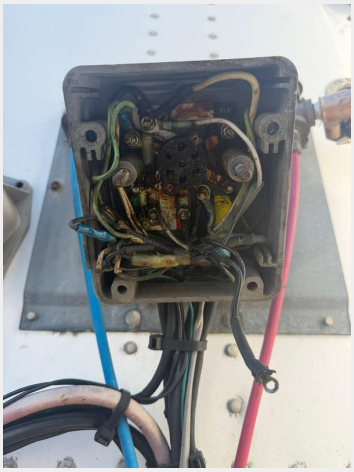

Suspension work — bushings, airbags, hangers and shocks.

Electrical & lights

Wiring, nose sockets, lights and LED upgrades.

Wiring, sockets and lighting — repaired and sealed against the weather.

Landing gear

Leg replacement and crank repair — dropped trailers back in service fast.

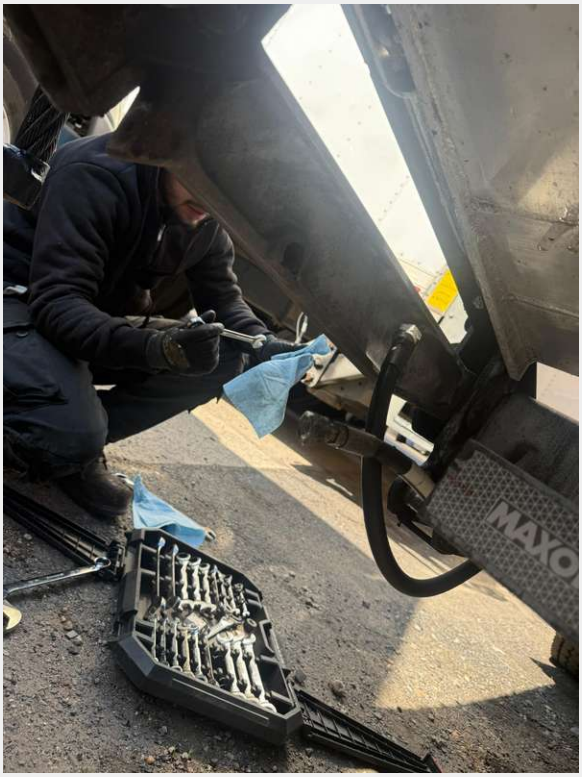

Landing gear replacement and repair — fitted, aligned and load-tested.

Liftgate repair / install

Hydraulic liftgate repair, service and installation.

Liftgate service and hydraulic repair — Maxon and all major brands.

Undercarriage & frame

Crossmembers, ICC bumpers and structural frame work.

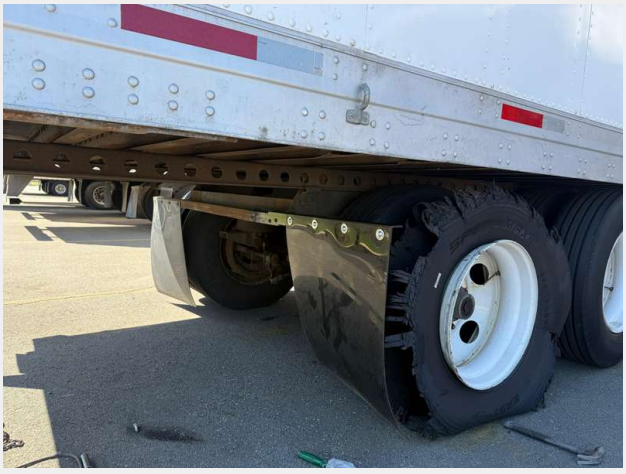

Frame and crossmember work — rebuilt, finished and painted for the long haul.

Road service / on-site repair

We come to you — customer lots, warehouses and roadside.

On-site repairs at your lot — we bring the shop to you.

General maintenance / PM service

Inspections, greasing and preventive maintenance fleets can count on.

Preventive maintenance — greasing, inspections and adjustments that keep small problems small.

Before & After

Six of our favorite transformations. The full 56-pair gallery is on our website.

Full Box Rebuild — Bare Frame to Finished Box

BEFORE	AFTER
	

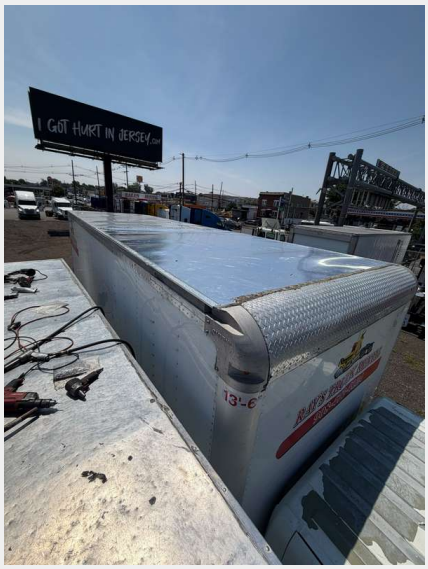

A complete box body built on the truck over 8 days: frame, panels, roof and liftgate.

Champion SE — Rear Sill & ICC Bumper Rebuild

BEFORE	AFTER
	

Bent rear sill and ICC bar replaced, new lights and fresh conspicuity tape.

Ray's Box Truck — Full Roof Replacement

BEFORE	AFTER
	

Roof torn open at the front corner, replaced with a new mirror-finish roof.

Budweiser #149 — Collapsed Nose Rebuilt

BEFORE	AFTER
	

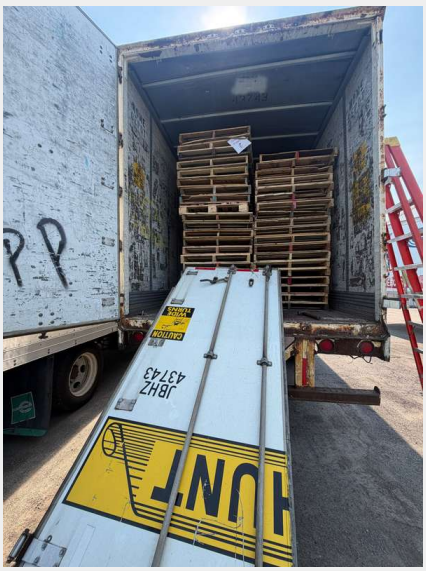

Nose caved in with rotted roof wood exposed — fully rebuilt the next day.

Morgan Box Truck — Nose Cap Rebuild

BEFORE	AFTER
	

Corner torn open and roof skin peeled — rebuilt with a brand-new polished Morgan cap.

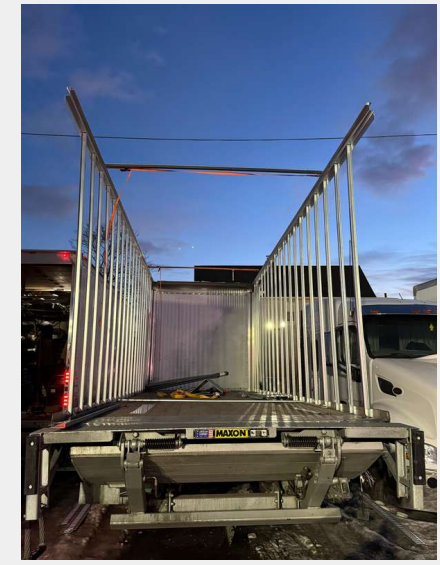

J.B. Hunt — Rear Door Re-Hung

BEFORE	AFTER
	

Rear door completely off the trailer — re-hung, aligned and closing right.

Rebuild Story — The Full Box Build

February 2026: a box truck body built from a bare aluminum frame to a finished box in 8 days — panels, roof and liftgate, all in our yard.

1 · Bare frame

2 · Front paneled

3 · One side done

4 · Opposite wall on

5 · Walls up, roof next

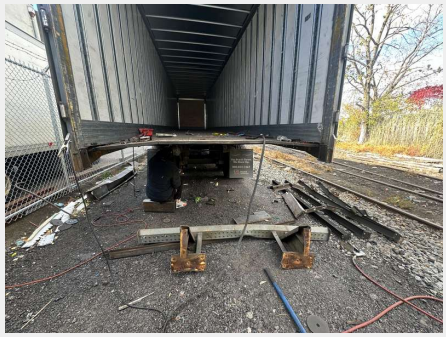

6 · Finished box

Rebuild Story — Champion SE Rear Rebuild

November 2025: a dry van rear end brought back from bent and broken — new sill welded in, new ICC bumper, lights and tape, in 4 days.

1 · Damaged rear

2 · Teardown

3 · Welding the new sill

4 · New ICC fitted

5 · Lights & tape on

6 · Rebuilt rear
